Level 1	Long Underwear																											
Silk Line	Silky smooth PowerDry against the skin	Polartec PowerDry Silk Weight						4.5	3.5	5.5	5.5																	Made from Polartec's Silkweight PowerDry, a highly breathable and comfortable fabric that maximizes moisture movement. The Silk Line shirt moves 30% more moisture and dries two times faster than cotton.
Base Line	Smooth mid weight perfection	Base Line with Antimicrobial properties						5	4	6	6																	A must-have for anyone in cold conditions, this medium-weight fabric is cut from advanced fabrics, that quickly wicks moisture away from the body, and stays comfortable in more conditions.
Level 2	Long Underwear Fleece																											
Grid	100 weight fleece with Grid	Polartec PowerDry Grid Fleece	2		5					10	12																	The Grid Pullover is made with Polartec's PowerDry, a highly breathable fleece with different yarns on the inside and out. The inside grid pattern traps warm air and moves moisture to the outside where it dries very quickly.
Level 3	Fleece																											
Malamute	High loft Fleece	Polartec High Loft	3		4																							The Malamute is a high loft fabric with looser weave than most fleece. This creates an incredible package that is warm, compressible, light, breathable, and dries quickly.
Cold Blooded	Warmest Windbloc Fleece	Polartec Thick Windbloc	5	4	2	5								x					x									The warmest fleece on the market, the Cold Blooded includes two layers of fleece with a Windbloc membrane in the middle. Soft and quite both inside and out, it'll block wind and rain.
Cloud Cap	Light weight Windbloc Fleece	Polartec Light Windbloc ACT	3	4	4	4								x					x									A light Windbloc fabric from Polartec, the Cloud Cap blocks 98% of the wind, allowing for increased breathability. All laminated together, a micro fleece outer, and PowerDry mesh create a light versatile, 'go anywhere' package.
Chill	60 Windproof - warm	Polartec Windpro	4	3	3	4								x					x									4 times more wind resistant than traditional fleece, the Chill is warm, soft, quite, and versatile. The dense weave creates the wind protection, and is very warm as a part of the Camber Layering System.
Classic	Traditional weight Fleece	Polartec 200	3	3	3	1																						Polartec 200 started the fleece craze back in the 70's and is still a great fabric for compressible warmth, and great looks.
Level 4	Wind Shirt																											
Bora	Light weight wind shell	EPIC's Glacier		4	3	5																						Silicon encapsulation creates a a windproof, water resistant barrier to the elements. Recommended for use over the base line, and under the Advantage BDU for protection from the elements.

Product	BeyondClothing.com	(800)741-3369	Connect@beyondclothing.com
T-Shirt	Advanced patterning creates a great look, with comfort that is built for movement. Seams are flat, and located away from pressure points for all day active comfort.		
Brief	A traditional brief with enhancements you come to expect from Beyond. No inseam increases long wear comfort, while a brushed elastic waist band keeps you comfortable. Fly, or no fly...its up to you.		
Long Sleeve	Advanced patterning creates a great look, with comfort that is built for movement. Seams are flat, and located away from pressure points for all day active comfort.		
Pant	A traditional brief with enhancements you come to expect from Beyond. No inseam increases long wear comfort, while a brushed elastic waist band keeps you comfortable. Fly, or no fly...its up to you.		
Action Shirt	Versatile, and light, the action shirt includes a 1/4 front zip, flat seams, and freedom of movement.		
Q Jacket	Versatile for technical or everyday wear, the Q is a square cut, with a dropped tail, zippered hand pockets, elastic wrists, doubled collar, one handed shock cord, and a versatile set of fabrics to choose from.		
Shock Jacket	With Raglan sleeve (sleeve begins at neck and ends at wrist), gusseted under arm, and articulate elbows, the Shock Jacket is the most protective pattern Beyond offers with less seams, and freedom of movement. Need more options? Go with the X or T jacket.		
X Jacket	Our proven pattern that has won many awards (ie. Climbing Mags A Grade), the X Jacket is built for movement, and use with many options to choose from. Raised hand pockets, elastic wrists, soft inner collar, one handed shock cord are standard.		
T Jacket	Built originally for the Navy SEALs, the T-Jacket is worn by everyone from Secret Service, FBI, weekend warriors, and the SEALs. Many options are tactical specific, and are your choice. Raised hand pockets, elastic wrists, soft inner collar, one handed shock cord are standard.		
Shock Pant	The diamond crotch creates freedom of movement with comfort and less seam tension. An incredible set of options make this pant incredibly versatile. Take it from a simple travel pant to the most technical pant ever. Verticle zippered hand pockets, and zippered fly with snap are standard.		
Trad Pant	A traditional pant, the Trad pant is at home in the office, or on the slopes. Angled zippered hand pockets, and zippered fly with snap are standard.		
Ultimate Pant	The Ultimate pant creates the most advanced fleece pant on the market. With a choice of many fleece fabrics, and options such as durable rear, hip zips, and crampon proof ankles, this is the Ultimate Pant.		
Shell Jacket	Simple and light, Beyond's new Shell Jacket uses the latest in lamination technologies, is waterproof, and built for use in the worst of conditions.		
Shell Pant	Simple and Light, Beyond's new Shell pant is there for you when the sky opens up.		
Primaloft Jacket	Built for layering over Levels 1-5, the Primaloft Jacket is a loose cut for versatility, freedom of movement, and increased warmth.		
Primaloft Vest	Built for layering over Levels 1-3, the Primaloft Vest is versatile and light. Wear under a windproof L5, and fear not.
